**Cephalexin 500mg** is a broad-spectrum antibiotic used to treat a range of bacterial infections. It's effective against respiratory tract infections, skin infections like cellulitis, ear infections, bone infections, and urinary tract infections (UTIs). By inhibiting bacterial cell wall synthesis, Cephalexin halts the growth of bacteria, leading to their destruction. This medication is suitable for both adults and children. It's especially useful against Gram-positive bacteria, including Streptococcus and Staphylococcus species. Medzsupplier provides Cephalexin 500mg, ensuring high-quality treatment for various infections. Always follow a healthcare provider's instructions regarding dosage and duration to achieve optimal results.
