Deck Cleaning with High-quality equipment

To prepare the floor for oiling we clean using a unique soft brush Germany Engineered Terrassen-Blitz Sander. This powerful machine removes all previous coatings, dirt, grey and moss without using water, high pressure or chemicals. It removes most stubborn layers even in narrow edges and corners. Unlike conventional belt sanders with abrasive belts, there is no loss of the timber profile. Most importantly, the built-in vacuum cleaner sucks up dust, dirt and allergens so there is no health hazard.
