Erectile disorder (ED or impotence) is a sensual condition that helps men to gain and even maintain a firm erection during the sensual contact with the lady. This illness does not allow men to gain sensual pleasure from the sensual activity. **Tadagra Super Active** from Snovitrasuperpower is an oral medication used in the treatment of erectile disorder, or ED, in males. It comprises **Tadalafil 20mg**.

Men who want to be free of erection failure or ED can prefer this ED medication. The Tadagra Super Active medication is in tablet form that functions to obstruct the working of the pde5 enzyme. This raises the stream of blood to the male organ. This helps men to acquire firm sensual contact with the lady.

Causes of Erectile Disorder (Or Impotence) in Males

A lot of factors can have a great impact on the vascular system, nervous system, and endocrine system. You are more likely to suffer from erectile disorder with increasing age.

The following are the various conditions that could cause erectile disorder in males:

- type 2 diabetes
- heart and blood vessel disease atherosclerosis
- high blood pressure
- chronic kidney disease
- multiple sclerosis
- Peyronie's disease
- injury from treatments for prostate cancer
- radiation therapy and prostate surgery
- injury to the male organ, spinal cord, prostate, bladder, or pelvis
- surgery for bladder cancer

Men who suffer from diabetes are more likely to develop erectile disorder. Tadagra Super Active is an efficient medication designed to deal with the problem of erection failure, or ED in males. It includes inside it an active ingredient that is Tadalafil 20mg. The medication helps men to acquire firm and stiff male organs. It helps men to easily penetrate their male organ into the vagina of their companion.

The following are the psychological or emotional issues that could cause erectile disorder in males:

- fear of sensual failure
- anxiety
- depression
- low self-esteem
- stress
