Another name for a vCard file is a VCF file, which is an electronic business card. It is a straightforward text document with multiple fields. Microsoft Windows Contacts, Microsoft People, Microsoft Outlook 365, Mozilla Thunderbird, Palm Desktop, and Nokia PC Suite for Windows are just a few of the tools that can open vCard files. Additionally, macOS apps like vCard Explorer, Apple Contacts, and Palm Desktop can open vCard files.

### **DOWNLOAD NOW**

Contact details that are easily accessible in other email programs are shared via vCard files. One or more.vcf files can be saved by vCard files.

Users occasionally need to divide vCard files across several contacts for their own purposes. Therefore, to halt the user's quest for broken vCard files. I've thought of several ways to split vCard files.

### **How to Manually Divide vCard Files Among Several Contacts**

You must follow the blog if you wish to Split or divide vCard files into several contacts. Additionally, there are two steps in the manual process for extracting individual contact files from VCF files.

- 1.VCF to Windows Conversion Connect
- 2.A single VCF file to Windows contacts

### **How to Convert VCF to Contact in Windows ?**

- 1.Go to C:Users%username%Contacts first.
- 2.Click the Import button now.
- 3.The dialogue window labeled "Import to Windows Contact" will open here.
- 4.Select vCard (VCF file) from the Import to Windows menu.
- 5.Next, pick the location and pick the VCF or vCard file.
- 6.The ability to choose vCard or VCF files for every contact will now be available to you. After filling out the necessary field, press OK.

### **Connect a Single VCF file to Windows Contacts**

- 1.Navigate to C:Users%username%Contacts now.
- 2.Next, press the Export button.
- 3.Click the Export button after selecting the vCard folder (which contains.vcf files).
- 4.Select the place in which you wish to save the VCF files here.
- 5.To save individual VCF files to the chosen path, click the "Ok" button.

The two manual processes mentioned above will assist users in dividing vCard files into several contacts. However, the manual approach also has a number of drawbacks, including laborious

procedures, uncertain data integrity, the need for technical know-how, and challenging stages.

### **How to Divide vCard Files Among Several Contacts by using professional Method?**

The most effective technique to divide vCard files among several contacts is to use **Softaken [vCard Splitter](#)**. Users can divide vCard files individually or in batches using the expert software. Nevertheless, users can easily combine several vCard files into a single one using the software.

### **How to Divide vCard Files?**

1. Install the vCard Splitter program after downloading it.
2. Choose the vCard file by clicking the Add files or Add folder option.
3. Next, select the vCard file and press the "Open" button.
4. To save the resulting files, tap the Destination path button after adding the vCard file.
5. To divide your vCard files into several contacts, click the Split option now.

Here's how to use **expert software to [split vCard files](#)**. Throughout the procedure, the software maintains the integrity of the data.

I've covered both professional and manual ways to split vCard files on this blog. The manual method has many drawbacks. To get around all of the limitations, I advise you to choose a professional solution.
