Microsoft Outlook users often face issues with large PST files, which can slow down performance, cause corruption, or make data management difficult. To ensure smooth email operations, it is essential to divide large PST files into smaller parts. In this guide, we will explore an efficient and secure method to split large PST files using MailsDaddy PST Split Tool.

Why Do You Need to Split Large PST Files?

Oversized Outlook PST files can cause multiple issues, such as:

- Slow Performance:** Outlook becomes sluggish with large PST files.
- Corruption Risk:** Exceeding size limits can lead to file corruption.
- Backup Issues:** Large files are harder to back up and restore.
- Data Accessibility:** Smaller files improve data retrieval speed.

To avoid these problems, using a reliable PST splitter is the best solution.

Best Way to Split Large PST Files

MailsDaddy [PST Split Tool](#) is a powerful solution designed to break large PST files without data loss. It ensures safe and efficient splitting while maintaining the original structure.

Key Features of MailsDaddy PST Split Tool

Multiple Split Options – Divide oversized Outlook PST files by size, date, folder, or email ID.

No Data Loss – Preserves email formatting, attachments, and metadata.

Supports ANSI & Unicode PSTs – Works with all Outlook versions, including 2019, 2016, 2013, and earlier.

User-Friendly Interface – No technical skills required for splitting PST files.

Works with Password-Protected PSTs – Easily split even encrypted PST files.

How to Split Large PST Files Using MailsDaddy PST Splitter Software

Follow these simple steps to divide large PST files securely:

1. Download & Install MailsDaddy PST Split Tool on your system.
2. Launch the software and click on Add PST File to upload your Outlook PST file.
3. Select the splitting option – by size, folder, date, or email ID.
4. Choose the destination location to save the smaller PST files.
5. Click Start Process and wait for the software to break large PST files efficiently.
6. Once completed, access the divided PST files in the chosen folder.

Final Words
