Yes, there are many easiest ways to handle a large number of EMLX files converting into PST is by using a reliable converter tool like **Dailysoft EMLX converter software**. It supports bulk conversion. This tool allows you to select multiple EMLX files at once and convert them into a PST file without doing it one by one. It can also convert Apple Mail email files to PDF, PST, MSG, MBOX, HTML, NSF, TGZ, etc. and this is Simple to use. This tool also lets you maintain the folder structure and email data like attachments. It also provides a free trial download to test it before purchasing
